*...FOR A PERSONAL LASIK EXPERIENCE*

## CONGRATULATIONS!

By exploring LASIK surgery at Sugarland Eye & Laser Center, you are taking the first step towards freedom from glasses and contact lenses. Our refractive surgery patients are very important to us. At Sugarland Eye & Laser Center, you will be working with the very latest technology, highly-trained physicians, and a caring staff. Above all, you will receive the care and attention that we call the *personal LASIK Experience*, provided exclusively by Sugarland Eye & Laser Center.

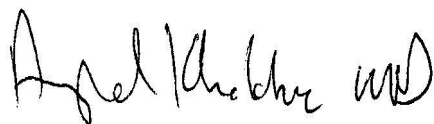

LASIK surgery involves three steps. The first is a thorough evaluation to determine your candidacy for the procedure. The second step is the surgery itself. The final step is the recovery period. *As the medical director and chief LASIK surgeon, I personally will complete every aspect of these three very important steps.*

The literature in this package has been assembled to answer some of the questions you may have about LASIK surgery. In this folder, you will find:

- An informational brochure about the LASIK at Sugarland Eye & Laser Center
- A questionnaire to help determine your candidacy for LASIK
- A description of LASIK surgery
- A biography about your surgeon
- A description of "Monovision"
- A brochure about Custom LASIK
- A brochure about our laser center, Laser Eye Institute
- A brochure about financing your procedure

Please review this information and return the enclosed questionnaire to one of our staff members. Thank you for your interest.

Sincerely,

Amjad Khokhar, M.D., F.A.A.O.  
Board Certified  
LASIK and Refractive Surgeon
